

Support with Technology

Dear Parents/Carers,

As we begin another season of remote learning, I just wanted to take this opportunity to make you aware of some of the practical support we can offer you in partnership with the Department for Education.

Mobile Data Increases

This scheme temporarily increases data allowances for families who **do not** have access to a fixed broadband connection. Mobile phone users on the following networks can currently apply.

- Smarty
- Virgin Mobile
- EE
- Tesco Mobile
- Three
- Sky Mobile

4G Wireless Routers

If an increase in data allowance is not a suitable option the Department for Education are also offering 4G wireless routers which we as a school can order for you.

Laptops/Devices

The Department for Education as part of their provision for home learning have also allocated our school 37 laptops (however at present we are unable to order and receive them).

If any of the above would be of genuine help to you then please do not hesitate to get in touch with me. All requests will be treated in absolute confidence. Please note, that in order for us to access an increase of mobile data we will need to obtain some personal information from yourself which will be handled in line with our GDPR policy.

More information on 'Remote Learning' will be posted on our school website at www.potkiln.net/remote-learning

Kind Regards

David Stevens.
